EmpactX Selects Value Hash as a Primary Data Center for Its Growing Bitcoin Mining Operations

Company targets more than 500 mining rigs by the end of the first quarter of 2027 and plans expansion into hash purchasing and Zcash mining early next year

MIAMI, Fla. — October 22, 2026 — EmpactX Inc. today announced that it has selected Value Hash as one of its primary data centers for hosting its growing Bitcoin mining operations. The EmpactX fleet hosted with Value Hash currently consists of Bitmain Antminer S21 Pro, S21 XP and S21 XP Hydro mining rigs, with additional equipment and mining methods under evaluation as the operation scales.

A Fleet Built to Scale

EmpactX Mining operates current-generation SHA-256 hardware, pairing air-cooled S21 Pro and S21 XP units with the liquid-cooled S21 XP Hydro, rated at 473 TH/s and 12 J/TH. The company is currently evaluating the addition of the Antminer S19 XP Hydro to its fleet, as well as a hash purchase program that would allow it to acquire hashrate alongside its owned machines.

Beyond Bitcoin, EmpactX is assessing mining on other proof-of-work networks, including Zcash, which is mined on dedicated Equihash hardware. Value Hash's infrastructure was a deciding factor: the company's facilities are positioned to support the full range of machines and methods EmpactX has under consideration.

Leadership Perspective

"Value Hash has proven to be a solid facility and service partner for every machine and method we are considering," said Craig Shawn Williamson, Chief Executive Officer of EmpactX Inc. "With over 100 rigs already on order and being added to our array, it is our intention to scale to more than 500 rigs by the end of the first quarter of 2027, and to expand into hash purchasing and Zcash mining early next year."

"We are proud to be working with EmpactX, one of the innovation stars of the blockchain industry," said a company spokesman for Value Hash. "EmpactX is building something genuinely new at the intersection of mining and on-chain commerce, and our facilities are ready to support their growth across every platform they choose to deploy."

About the Value Hash Partnership

Value Hash has owned, operated and developed Bitcoin mining data centers since 2017. Headquartered in Sherburne, New York, the company operates hosting facilities in New York, Nebraska and Kansas, including a Beatrice, Nebraska campus contracted for up to 40 megawatts, drawing on renewable generation sources including wind, solar and hydroelectric power. Value Hash provides colocation hosting with deployment, 24/7 monitoring and hands-on support, and designs custom switchgear and modular data centers in-house.

Powered by MPX and an On-Chain Affiliate Network

The MPX token powers the EmpactX ecosystem, supported by a growing affiliate network built on EmpactX Global, the company's innovative on-chain affiliate program. The platform runs without credit cards or credit card processors: payments and commissions are conducted in cryptocurrency and settled on a public ledger. MPX trades on the Base network, with a fixed total supply of 550,000,000 tokens, renounced contract ownership, and no ability to mint additional tokens.

About EmpactX Inc.

EmpactX Inc., headquartered in Miami, Florida, operates at the point where digital assets become infrastructure. Through EmpactX Mining, the company builds and operates Bitcoin mining capacity and places machines under the outright ownership of the people who buy them. MPX, its token on the Base network, powers EmpactX Global, an affiliate platform that conducts its business on-chain. Learn more at www.empactx.com.

Forward-Looking Statements and Disclosures

This press release contains forward-looking statements, including statements regarding fleet expansion, the number of mining rigs EmpactX intends to operate, the evaluation and potential adoption of additional equipment, a hash purchase program and mining on networks other than Bitcoin, and their expected timing. These statements reflect current intentions and are subject to risks and uncertainties, including equipment availability, hosting capacity, power costs, network difficulty, digital-asset prices and regulatory developments; actual results may differ materially, and EmpactX undertakes no obligation to update them. This press release is for informational purposes only and is not an offer to sell, or a solicitation of an offer to buy, any security in any jurisdiction. MPX is currently a utility token. Digital assets are volatile and are not insured by the FDIC, SIPC or any government agency, and you can lose the entire value of a position. EmpactX makes no representation as to the amount of Bitcoin or any other digital asset any machine will produce.
